## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by Betz et al. (DE-003537653A1). Betz et al. teaches a method for positioning and attaching a frame (R1) to a housing (R2) comprising providing solder pins on said housing such that said solder pins (St) reach within holes of said frame with a gap that provides a predetermined adjustment range of said frame relative to said housing; positioning said frame relative to said housing while said solder pins reach into said holes; and soldering the gap (abstract and Figures).

Claims 25 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Takesawa et al. (JP-362229884A). Takesawa et al. teaches a method for positioning and attaching a frame to a housing comprising providing solder pins on said housing such that said solder pins reach within holes of said frame with a gap that provides a predetermined adjustment range of said frame relative to said housing; positioning said frame relative to said housing while said solder pins reach into said holes; and soldering

the gap (abstract and Figures); said housing is part of an optical connector (12)

(abstract and Figures).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 25-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al. (6,653,724 B1). Kim et al. teaches a method for positioning and attaching a frame to a housing comprising providing solder pins on said housing such that said solder pins reach within holes of said frame with a gap that provides a predetermined adjustment range of said frame relative to said housing (abstract; Figures and column 2, line 46-column 3, line 59); positioning said frame relative to said housing while said solder pins reach into said holes; and soldering the gap (abstract; Figures and column 2, line 46-column 3, line 59); a lens plate is attached to said frame; said housing is part of an optical connector (abstract; Figures and column 2, line 46-column 3, line 59).
